AN ECO FRIENDLY ORGANIZATION

We introduce ourselves as one of the pioneers in recycling of Used Oil in India **Arun Industries** is one of the oldest oil recycling facility in Karnataka and it is one of the zero discharge oil recycling plants in India. Arun Industries has started in March 1990 for the recycling of Used Oils using vacuum distillation. By recycling used oils, we will be saving petroleum as well as foreign exchange.

THE ENVIRONMENT SAFETY APPROACH

Our fundamental approach is to ensure that the entire process of transporting, filtering, separating pollutants, distillation during recycling activity (with 100% free pollutant release to the environment) that ensure maximum safety to the environment. The yield of refined oil from this process is 100% pollutant free and can be blended safely with virgin oil or individually.

WHY REFINING USED OIL

- Used oil is the largest, single source of Hazardous recyclable material in India
- Just 1 litre of used oil can contaminate upto 1 million litres of fresh water
- Improperly discarded oil can contaminate ground and surface water and reduce soil productivity
- Oil in sewers can disrupt treatment plants and contaminate waterways
- Recycling used oil extends the life of a non-renewable natural resource
- If all used oil improperly disposed off in India were recycled, it could provide close to 60 million litres of high quality motor oil

ADVANTAGES OF CHOOSING ARUN INDUSTRIES

- Facility with environmentally sound management
- Authorization from KSPCB/CPCB
- Dedicated vehicles to transport hazardous waste
- Facility with hazardous waste management systems
- Close-loop process

OUR SERVICES

- Re-refining of Used oil
- We undertake recycling of Used Oils like once used Lubricating and insulating Oils
- Recycling Used Oils

OUR INFRASTRUCTURE

We have facility to process 720 KL of Used Oil per annum. Arun Industries exclusively deals with Re-refining of Used Oils. This activity is also extended customers who wanted to recycle their oils as the re-refined oil meets the BSI standards.

We procure Used Oil generated from power Generating Plants, Service Centers, Industries, IT Sector, Mall Etc.
